BUSINESS OVERVIEW

Brief History

Polycab India Limited was founded in 1964 by the Jaisinghani family as a manufacturer of electrical wires and cables in Mumbai. The company steadily expanded its operations by investing in modern manufacturing facilities and a strong distribution network across India. In 1996, it was incorporated as Polycab Wires Private Limited, marking its transition into a corporate entity. Over the years, Polycab diversified into power cables, optical fibre cables, and Fast Moving Electrical Goods (FMEG), including fans, switches, lighting, and switchgear. In 2019, the company was listed on the National Stock Exchange (NSE) and the Bombay Stock Exchange (BSE) through its Initial Public Offering (IPO). Today, Polycab is India's largest manufacturer of wires and cables, with a strong domestic presence and exports to over 80 countries.

Expansion And Growth

Polycab India Limited has grown into India's largest wires and cables manufacturer, with a diversified electrical products portfolio, a strong distribution network, and a significant global presence. Following are the brand's key milestones.

1964
Founded by the Jaisinghani family in Mumbai as a manufacturer and trader of electrical wires and cables.

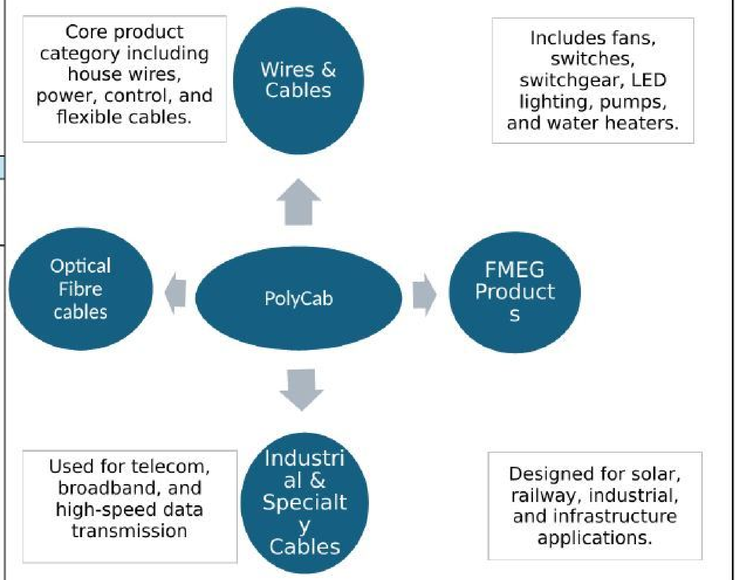

1996
Incorporated as Polycab Wires Private Limited, strengthening its corporate structure and supporting large-scale business expansion

2014
Expanded manufacturing capacity and distribution network, becoming one of India's leading manufacturers of wires and

2019
Successfully listed on the NSE and BSE through an Initial Public

2026
India's largest wires and cables manufacturer, exporting to over 80 countries with a diversified portfolio of electrical products.

Products and Services

POLYCAB'S COMPETITORS

RR Kabel Limited was **incorporated** in **1995** as part of the **RR Global Group, a diversified business conglomerate** with **operations** in the **electrical sector.** The company commenced operations by **manufacturing wires and cables** and gradually **expanded** its portfolio to become one of **India's leading electrical products manufacturers**. Over the years, RR Kabel **strengthened** its market presence by offering a wide range of products, including house wires, power cables, control cables, instrumentation cables, and specialty cables for residential, commercial, industrial, and infrastructure applications.

In addition to its core wires and cables business, the company diversified into the **Fast Moving Electrical Goods (FMEG)** segment through products such as switches, fans, LED lighting, switchgear, and home electrical accessories. RR Kabel was listed on the **National Stock Exchange (NSE)** and the **Bombay Stock Exchange (BSE)** in **2023**, marking a significant milestone in its corporate journey.

The company operates multiple manufacturing facilities across India and has an extensive distribution network comprising dealers, distributors, and retailers. It also **exports** its products to over **70 countries**, strengthening its position as a prominent player in the global electrical products market.

KEI Industries Limited was **incorporated** in **1968** as **Krishna Electrical Industries** and initially focused on **manufacturing electrical cables and wires**. Over the years, the company expanded its product portfolio to become **one of India's leading manufacturers** of wires, cables, and engineering solutions. Today, KEI offers a wide range of products, including house wires, low-, medium-, and extra-high-voltage (EHV) power cables, control and instrumentation cables, stainless steel wires, and specialty cables for industrial and infrastructure applications.

In addition to its manufacturing business, KEI undertakes **Engineering, Procurement, and Construction (EPC) projects** for power transmission and distribution, strengthening its presence in the infrastructure sector. The company has steadily expanded its manufacturing capacity and distribution network, serving customers across residential, commercial, industrial, and government sectors.

KEI Industries is listed on both the **National Stock Exchange (NSE)** and the **Bombay Stock Exchange (BSE)** and has established a strong domestic and international presence. The company operates multiple manufacturing facilities in India and exports its products to over **65 countries**, supported by an extensive network of **dealers, distributors, and institutional customers.**

KE Industries

Sales (In Crores)

PolyCab has shown dominant and aggressive growth, more than doubling its revenue from ₹12,204 Crores in 2021-22 to ₹28,884 Crores in 2025-26. It holds the lion's share of the market among the three peers, maintaining a steep upward growth trajectory every single financial year.

KEI Industries has maintained a highly stable and strong upward growth path, moving from ₹5,727 Crores in 2021-22 to ₹11,748 Crores in 2025-26. KEI comfortably holds the second position in this cohort, effectively doubling its revenue over the five-year period.

RR Kabel while starting with the lowest revenue in FY22 at ₹4,386 Crores. It has grown aggressively to reach ₹9,722 Crores by 2025-26. Its rapid percentage growth is allowing it to steadily narrow the revenue gap with KEI Industries.

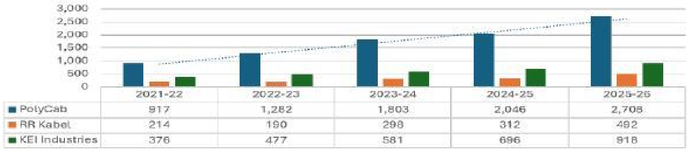

Total Asset (In Crores)

PolyCab has shown dominant and rapid asset growth, nearly tripling its asset base from **₹7,412 Crores** in 2021-22 to **₹20,465 Crores** in 2025-26. The steep upward trajectory, especially the massive jump in FY26, points to aggressive capital expenditure and capacity expansions to cement its market leadership.

KEI Industries has maintained a highly stable and strong upward growth path, growing its asset base from **₹5,727 Crores** in 2021-22 to **₹11,784 Crores** in 2025-26. The company effectively doubled its assets over the five-year period, reflecting disciplined, steady reinvestment to support its manufacturing capacity.

Net Profit (In Crores)

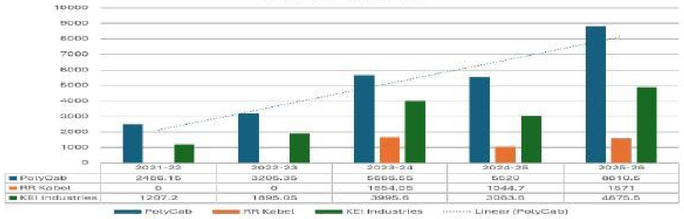

PolyCab has shown dominant and aggressive profit growth, nearly tripling its net profit from **₹917 Crores** in 2021-22 to **₹2,708 Crores** in 2025-26. It maintains a commanding lead over its peers, with a steep upward trajectory that reflects strong pricing power and economies of scale.

KEI Industries has maintained a highly stable and strong upward profitability path, growing its net profit from **₹376 Crores** in 2021-22 to **₹918 Crores** in 2025-26. The company successfully doubled its profits over the five-year period, demonstrating disciplined cost management alongside its expanding revenue base.

RR Kabel experienced a minor dip in net profit during FY23 (**₹190 Crores** down from **₹214**

Market Share Price

PolyCab has shown aggressive and dominant value creation, with its share price surging from **2,486.15** in FY22 to **8,810.5** in FY26. This massive upward trajectory aligns perfectly with its market leadership, tripling net profits, and strong earnings visibility mentioned in investor relations sections of their annual filings.

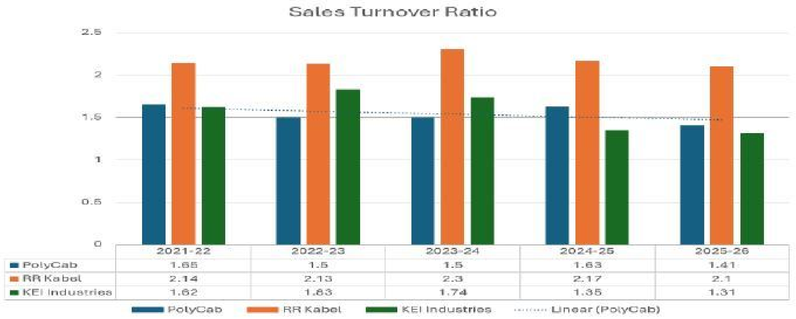

RR Kabel's chart records **0 values** for FY22 and FY23 due to the company being unlisted prior to its IPO. After entering the market, it faced short-term volatility—dropping to **1,044.7** in FY25—before staging a healthy recovery to **1,571** in FY26 as investor confidence gradually returned following infrastructure ramp-ups.

KEI Industries's **1,207.2**

Number of Employees	4,824	5,526	5,855	6,208	6,654	
Sales per employee	*1.19x*	*1.25x*	*1.38x*	*1.57x*	*1.77x*	

PolyCab has maintained a stable but lower range, fluctuating between **1.65x** down to **1.41x** across the tracking window. The slight downward linear trend is not a sign of operational weakness, but rather a structural byproduct of the company's aggressive in-house asset and manufacturing capacity creation that takes time to fully mature into revenue.

RR Kabel consistently leads the peer group with the highest ratios, peaking at **2.3x** in FY24 and closing at **2.1x** in FY26. This indicates a highly agile business model that effectively sweeps its factories and inventory to generate massive sales volumes relative to its asset footprint.

KEI Industries saw an initial jump in its ratio to a peak of **1.83x** in FY23, before

PolyCab: Shows the most aggressive improvement, nearly tripling individual output from **0.49** to **1.59**. Driven directly by major factory automation upgrades combined with strategic leaning of their corporate and on-roll worker pools.

KEI Industries: Consistently leads the pool, climbing steadily from **1.19** to **1.77**. It reflects a well-optimized mix of factory automation and balanced workforce scaling that prevents structural overhead drag.

RR Kabel: Displays an erratic trend, moving from a pre-IPO **0** in FY22 to a spike of **1.47**, before settling at **1.25** by FY26.Indicates that rapid capacity building and new worker hiring have briefly outpaced immediate sales translation.

Comparative Analysis — Polycab India, KEI Industries & R R Kabel

Wires & Cables / FMEG Industry | FY 2020-21 to FY 2024-25 | ₹ Crore unless stated

1. Business Description				
Polycab India Ltd				
Polycab is India's largest manufacturer of wires and cables, with a portfolio spanning flexible/building wires, power, control and specialty cables, plus a fast-growing FMEG segment (fans, lighting, switches, switchgear, solar and pumps). It holds roughly a 26-27% share of the organised domestic wires & cables market and also undertakes EPC (turnkey electrification) projects.				
KEI Industries Ltd				
KEI Industries manufactures Extra-High-Voltage (EHV), High-Tension (HT) and Low-Tension (LT) power cables, along with house wires and stainless-steel wire, serving both retail and institutional (industrial/infrastructure) customers in India and overseas. It also executes cabling EPC projects. KEI is a smaller, more industrial-cable-focused peer relative to Polycab and R R Kabel.				
R R Kabel Ltd				
R R Kabel is a consumer-electrical company selling wires and cables (house wires, industrial wires, power and special cables) and FMEG products (fans, lighting, switches, water heaters and appliances) under the RR brand. It is India's largest exporter of wires and cables and listed on the NSE/BSE in September 2023.				

2. Growth Comparison — 5-Year CAGR (FY21 → FY25)				
Metric	**Polycab India**	**KEI Industries**	**R R Kabel**	**Note**
Sales Growth (5-Yr CAGR)	26.4%	23.5%	29.4%	*Formula: (FY25 Sales / FY21 Sales)^(1/4) minus 1, linked to Income Statement sheet*
Total Assets Growth (5-Yr CAGR)	18.4%	24.5%	19.7%	*Formula: (FY25 Total Assets / FY21 Total Assets)^(1/4) minus 1, linked to Balance Sheet sheet*
Net Profit Growth (5-Yr CAGR)	23.3%	26.8%	23.2%	*Formula: (FY25 Net Profit / FY21 Net Profit)^(1/4) minus 1, linked to Income Statement sheet*
Market Price Growth (5-Yr CAGR, trailing)	38.0%	51.0%	76.0%	*Linked to Sources & Assumptions sheet (screener.in trailing Price CAGR). R R Kabel shows 1-Yr CAGR (no 5-yr history — listed Sep-2023).*

3. Sales per Rupee of Assets Deployed (₹ Sales / ₹ Total Assets)				
Year	**Polycab India**	**KEI Industries**	**R R Kabel**	**Formula**
FY2020-21	1.25x	1.39x	1.58x	*Sales(Income Statement) ÷ Total Assets(Balance Sheet), same FY*
FY2021-22	1.65x	1.62x	2.14x	
FY2022-23	1.50x	1.83x	2.13x	
FY2023-24	1.49x	1.74x	2.30x	
FY2024-25	1.63x	1.35x	2.17x	

4. Sales per Employee (₹ Lakh per employee)				
Year	**Polycab India**	**KEI Industries**	**R R Kabel**	**Formula**
FY2020-21	189.0	213.6	N/A	*(Sales ₹Cr × 100 ÷ Employee count) = Sales per employee in ₹ Lakh; employee counts from Sources & Assumptions sheet*
FY2021-22	275.4	313.1	172.2	
FY2022-23	314.6	405.2	184.4	
FY2023-24	372.5	439.2	212.1	
FY2024-25	406.2	474.9	207.1	

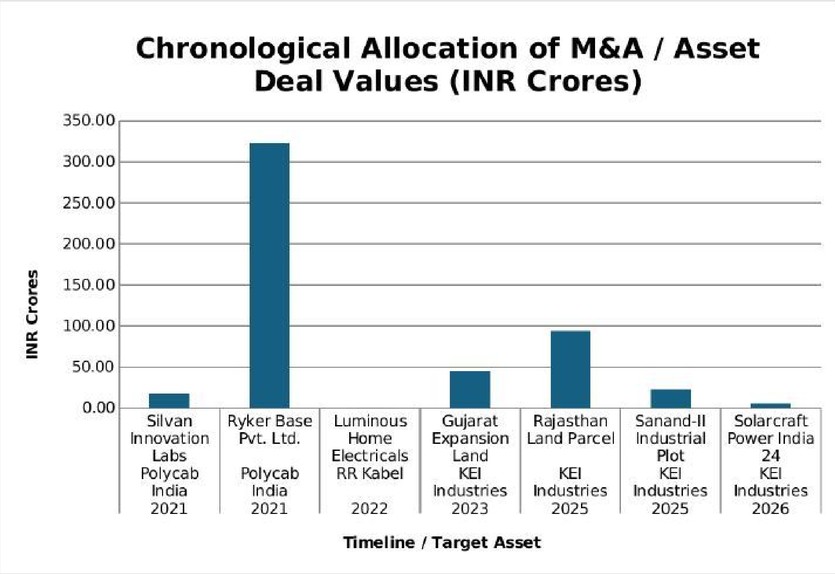

5. Comments / Observations	
Sales & profit growth	Polycab is the largest and fastest-growing of the three on absolute sales, but KEI shows the strongest 5-year Net Profit CAGR of the trio (see Section 2), reflecting margin recovery and improving asset turns over FY21-FY25 — see Section 3.
Balance sheet strength	All three companies have kept borrowings low relative to net worth (see Debt-to-Equity on the Balance Sheet sheet) and have funded growth mostly through internal accruals / reserves.
Efficiency (Sales/Asset, Sales/Employee)	Compare the Section 3 and 4 trends across the years — a rising ratio indicates the company is generating more revenue per rupee of assets / per employee, i.e. improving operating leverage and efficiency.
Market price	R R Kabel has under two years of trading history (listed Sep-2023), so its price CAGR is not comparable to the 5-year figures for Polycab and KEI — use the 1-year CAGR or since-listing return for it instead.

Master Ledger of All Corporate Transactions & Asset Acquisitions (Sequential Order)

Year	Company	Acquired Entity / Asset	Transaction Type	Deal Value / Stake	Strategic Core Purpose	Sales Impact Overview	Profit & Margin Impact	Verification Source
2021	Polycab India	Silvan Innovation Labs	Full Corporate Acquisition	₹18.2 Crores (100% stake)	Expanded IoT & automation engineering capacity to drive smart automation upgrades into Polycab's premium product ecosystem.	Accelerated B2C FMEG segments to cross-sell smart automation devices; top line scalability reached record run rates under 'Project Leap'.	Initial margins absorbed small operational overheads; subsequent scale optimization elevated premium FMEG segmental margins.	Official Polycab SEBI Regulation 30 Filings & Exchange Intimations
2021	Polycab India	Ryker Base Pvt. Ltd.	Strategic Structuring Divestment	₹323 Crores Enterprise Value	Monetized full equity stake to Hindalco Industries to exit volatile, non-core copper rod manufacturing complexities.	Substituted external corporate manufacturing top line with an optimized long-term manufacturing raw supply tolling arrangement with Hindalco.	Protected downstream cable operating margins from volatile raw commodity pricing; stripped off internal overheads completely.	Polycab India Investor Presentations & Hindalco Corporate Media Briefs
2021-22	KEI Industries	Pathredi & Chinchpada Plants	Brownfield Expansion Acquisition	Internal Capex Allocation	Acquired high-output machinery assets to optimize ongoing industrial LT and HT power cable configurations.	Directly expanded immediate production output volume across core institutional and dealer distribution streams.	Optimized capacity utilization ratios, driving structural operational leverage benefits down to net margin lines.	KEI Industries Annual Reports & Statutory Financial Disclosures
2022	RR Kabel	Luminous Home Electricals	Global Segment Carve-out	Undisclosed Strategic Value	Acquired complete consumer portfolio of fans, decorative lights, and appliances from Schneider Electric to anchor B2C pivot.	Highly expansionary impact on FMEG top line; boosted segment scale significantly, contributing heavily to total revenue hit of ₹9,722.36 Cr by FY26.	Severe integration friction and front-loaded marketing spent depressed FY23 profits to ₹188.93 Cr before strong rebound to ₹486.90 Cr in FY26.	RR Kabel IPO Red Herring Prospectus (RHP) & Finology Ticker Database
2023-24	KEI Industries	Gujarat Expansion Land	Greenfield Plot Acquisition	Internal Asset Capex	Strategic securement of ~70 acres of industrial ground layout to build future EHV (Extra High Voltage) production lines.	Positioned top-line pipeline to aggressively contest upcoming massive domestic institutional infrastructure bidding cycles.	Delayed near-term asset return ratios due to active gestation period; robust underlying support for long-term profit visibility.	NSE Corporate Actions Ledger & Institutional Equity Research Archives
2025	KEI Industries	Rajasthan Land Parcel	Asset Capacity Acquisition	₹93.58 Crores	Secured a massive 74,000 square meters industrial plot for multi-year factory expansion frameworks.	Expanded production volume baseline to execute high-value domestic institutional underground power cable works.	Financed purely out of institutional capital buffers, leaving regular bottom line immune to debt interest constraints.	KEI Corporate Disclosure to BSE/NSE under Regulation 30
2025	KEI Industries	Sanand-II Industrial Plot	Greenfield Expansion Asset	₹23.05 Crores	Acquired 45,965 square meters industrial plot to kickstart phase-1 operational setup of greenfield wire lines.	Spurred rapid standalone quarterly revenue jumps in late FY25/FY26 upon integration of immediate machinery assets.	Advanced structural factory absorption efficiencies, protecting the company's 20-30% YoY independent net profit uptrend.	CareEdge Monitoring Agency Reports & Brokerage Equity Research Note
2026	KEI Industries	Solarcraft Power India 24	Captive Power Utility (26% Stake)	₹5.90 Crores	Acquired strategic minority holding in an SPV solar entity to source up to 11.25 MW of green power for internal operations.	Zero direct commercial external sales added to consolidated books as it acts as an internal utility vehicle.	Shields the operational cost line by locking in favorable electricity tariffs, driving future margin defense.	KEI Industries SSSA Share Subscription Filings to Exchanges (May 2026)

Post-Acquisition Granular Financial Impact Matrix (Sales, Profit & Cash from Operations)

Company	Acquisition Vector	Post-Acquisition Sales Impact	Post-Acquisition Profit Impact	Post-Acquisition Cash Flow (CFO) Impact	Key Financial Impact Numbers (INR Cr)	Structural Balance Sheet Status
Polycab India	Silvan & Ryker Restructuring	Accelerated alternative high-margin premium smart consumer verticals; cross-selling expanded corporate top line under Project Leap.	Maintained operating margins around 13-14% by shifting raw copper sourcing into long-term tolling structures post-Ryker exit.	Extremely generative cash cycle; zero external debt expansion left cash from operations highly resilient, building a massive bank cushion of ₹4,190 Cr by FY26.	• Sales: FY21 ₹8,926.5 Cr → FY23 ₹14,108 Cr → FY26E ₹24,000+ Cr • EBITDA: FY21 ₹1,100 Cr → FY23 ₹1,852 Cr (Margin: 13-14%) • Net Profit (PAT): FY23 ₹1,282 Cr • CFO: FY23 ₹1,430+ Cr • Reserves Cushion: ₹4,190 Cr by FY26	Fortress Balance Sheet: Practically debt-free status with a minimal 1.7% Debt-to-Equity ratio.
RR Kabel	Luminous FMEG Portfolio Takeover	Drove massive volume scaling for domestic consumer electronics branch; overall top-line revenue expanded to ₹9,722.36 Cr by FY26.	Absorbed heavy early marketing outlays causing a temporary dip to ₹188.93 Cr in FY23 before scaling aggressively to a record ₹486.90 Cr net profit by FY26.	Maintained highly disciplined cash cycles post-integration, achieving an efficient 5-year average CFO/PAT liquidity metric of 1.13x.	• Total Sales: FY21 ₹4,386 Cr → FY26E ₹9,722.36 Cr • Net Profit (PAT): FY23 ₹188.93 Cr → FY26E ₹486.90 Cr • CFO Liquidity Metric: 5-year avg CFO/PAT of 1.13x • Annual CFO: FY24 ₹350+ Cr → FY26E ₹550+ Cr	Publicly Capitalized: Replaced legacy Private Equity lines (TPG Capital) with ₹1,964.01 Cr IPO fresh public equity blocks.
KEI Industries	Industrial Land & Captive Solar Utility SPV	Fueled large-scale capacity surge to execute institutional Extra High Voltage (EHV) underground cabling system contracts.	Protected core standalone net profit growth matrix (advancing 20-30% YoY through late FY25/FY26) via advanced manufacturing asset expansions.	Heavy recurring capex investments balanced cleanly by institutional cash reserves, avoiding any pressure on operational liquidity lines.	• Total Sales: FY21 ₹4,887 Cr → FY23 ₹6,912 Cr → FY26E ₹11,000+ Cr • Standalone Net Profit: FY21 ₹273 Cr → FY23 ₹477 Cr → FY26E ₹850+ Cr • Independent Net Profit Trend: 20-30% YoY Growth • CFO: FY23 ₹382 Cr → FY24 ₹510 Cr	Equity Buffered: Replaced traditional banking consortium loan exposure with a massive permanent ₹2,000 Crore QIP equity injection.

PART 1: Segment Definitions

Polycab India: Divides business into **Wires & Cables** (core), **FMEG** (Fast Moving Electrical Goods - fans, lighting, appliances), and **EPC** (formerly "Others"). *Note: They divested their Copper segment in FY22.*
KEI Industries: Divides business into **Cables & Wires** (core), **EPC Projects**, and **Stainless Steel Wire** (a niche B2B segment unique to KEI). They do not compete in the consumer FMEG space.
RR Kabel: Divides business strictly into **Wires & Cables** (core) and **FMEG** (formerly Consumer Electricals). They are purely a product company with no EPC division.

PART 2: Segment-by-Segment Comparison

Segment 1: Wires & Cables
Revenue Leader: Polycab is completely dominant. With FY25 revenues of ₹19,236.6 cr, they are more than double the size of KEI and triple the size of RR Kabel.

Growth Rate: This is a rising tide lifting all boats. All three players are growing at a blistering **26% - 27.5% CAGR**. Since the general Indian cable industry grows at roughly 10-14%, this proves *all three* are rapidly eating market share from smaller, unorganized regional players.

Margin Winner: Polycab. Their immense scale allows them to command a highly lucrative 13.6% EBIT margin. KEI hovers respectably around 10.6%, while RR Kabel struggles to break 8% (ending at 7.4% in FY25).

Segment 2: FMEG
The Competitors: Polycab vs. RR Kabel. (KEI smartly avoids this space entirely).

Revenue Scaling: RR Kabel is growing FMEG at a wild **47.6% CAGR**, jumping from ₹1.9B to ₹9.2B in four years. Polycab hit a rough patch but recovered to ₹16.8B in FY25 (12.9% CAGR).

Profitability Check: Both companies are hemorrhaging cash here to buy market share against incumbents like Havells. Polycab posted a ₹(38.9) cr loss in FY25, while RR Kabel posted a ₹(459) mn loss. However, RR Kabel is slowly narrowing its loss margin (from -15% in FY21 to -4.9% in FY25).

Segment Wise Comparison

Wire and Cables

Company	Cumulative Revenue (FY25)(₹ cr)	4-yr CAGR
Polycab	19,236.60	26.10%
KEI Industries	9,177.00	26.60%
RR Kabel	6,680.80	27.50%

FMEG

Company	Cumulative Revenue (FY25)(₹ cr)	4-yr CAGR
Polycab	1,682.20	12.90%
KEI Industries	-	-
RR Kabel	929.6	47.60%

PART 3: Strategic Takeaways & Capital Efficiency

1. Capital Allocation Efficiency
Polycab is the most disciplined capital allocator. They recognized FMEG was destroying margin, so they intentionally slashed CapEx in that segment (from ₹1,329 mn in FY23 down to ₹630 mn in FY25) to focus on operational turnarounds. Simultaneously, they poured a record ₹8,953 mn into expanding their highly profitable W&C segment.

KEI is showing ruthless focus. They have effectively starved their EPC division of capital (recording negative asset additions recently) and redirected all firepower to W&C manufacturing to keep up with Polycab's capacity.

RR Kabel is aggressively scaling segment assets to catch up, but their sub-par 7.4% margins in their core business suggests they are competing heavily on price rather than brand premium.
2. Growth Potential vs. Margin Risk
Highest Growth Potential: The **Wires & Cables** segment remains an absolute goldmine. The fact that all three companies can compound at ~27% over four years without destroying each other's revenue streams shows the infrastructure and real estate tailwinds in India are massive.

Highest Margin Risk: The **FMEG** segment. It is a severe drag on Return on Capital. KEI's decision to stay out of FMEG looks brilliant in hindsight, as it protects their bottom line. RR Kabel's rapid 47% growth in FMEG looks impressive on the top line, but it is entirely subsidized by the profits of their cables division.

Group Structure & Investment Analysis — Polycab, KEI, RR Kabel

FY ended 31 March 2023 | Subsidiaries & shareholding, Associates/JVs (all three companies), and Polycab's investments (ex-subsidiaries/associates/JVs), FY19-FY23

8 / 1 / 2	NIL	~₹323 Cr
SUBSIDIARIES (APPROX., FY23) Polycab 8 | KEI 1 | RR Kabel 2	LIVE ASSOCIATES & JVs Across all three, as at 31-Mar-2023	POLYCAB'S ONLY MATERIAL JV EXIT Ryker Base sold to Hindalco, FY22

Group Structure — Subsidiaries & Holding

Polycab India Limited (CIN L31300GJ1996PLC114183)

Company	Subsidiary	Country	Holding %	Nature / Business of Subsidiary
Polycab India Ltd	Polycab Wires Private Limited	India	100%	Erstwhile flagship wires-manufacturing entity; core wires & cables manufacturing now largely consolidated into the listed parent post-IPO. Confirm live status from FY23 AOC-1.
Polycab India Ltd	Polycab Middle East FZE / DMCC	UAE	100%	Marketing, distribution and sale of wires, cables and FMEG products in the Middle East (part of the ₹1,384 Cr International Business segment, FY23).
Polycab India Ltd	Polycab USA Inc. (or similar entity)	USA	100%	Sales and marketing support for cable exports to the United States.
Polycab India Ltd	Overseas marketing subsidiaries	UK / Australia / other	100%	Local sales, marketing and after-sales support for exports to 50+ countries.
Polycab India Ltd	Dowells Electricals / Dowells Cable Accessories	India	Subsidiary (acquired brand)	Manufacture of cable joints, lugs, glands and accessories under the 'Dowells' brand; verify current corporate status (some entities amalgamated).
	Discussion			Polycab is India's largest integrated wires & cables manufacturer (₹1,25,369 Mn W&C revenue, FY23) and a fast-growing FMEG player (₹12,512 Mn FY23 revenue; fans, lighting, switches, switchgear, solar, pumps), with International Business contributing ₹13,835 Mn. It runs ~8 direct/step-down subsidiaries, mainly overseas

KEI Industries Limited (NSE: KEI, BSE: 517569)

Company	Subsidiary	Country	Holding %	Nature / Business of Subsidiary
KEI Industries Ltd	KEI Cables SA Pty Ltd	South Africa	100%	Local sales, marketing and distribution support for cable exports into South Africa / Sub-Saharan Africa. KEI's FY23 BRSR discloses this as its only subsidiary and states it is 'not material' to the company.
	Discussion			KEI runs the leanest structure of the three: manufacturing (5 facilities — Bhiwadi, Pathredi, Chopanki, Silvassa, Rajasthan), EPC and retail are all housed within the listed parent. It has no domestic manufacturing subsidiaries and only one small,

RR Kabel Limited (unlisted as at 31-Mar-2023; IPO'd Sep-2023)

Company	Subsidiary	Country	Holding %	Nature / Business of Subsidiary
RR Kabel Ltd	Overseas sales/marketing subsidiaries	Middle East / Africa / other export markets	To be confirmed from RHP (typically wholly owned)	Local sales and distribution support; RR Kabel exports to 90+ countries. Formal list disclosed in the RHP's 'Our Subsidiaries' section.
RR Kabel Ltd	Luminous Home Electrical (fans & appliances) — acquired undertaking	India	Acquired business (Apr-2022)	FMEG business (fans, small appliances) acquired from Luminous Power Technologies; treated as an acquired undertaking rather than a distinct listed subsidiary.
	Discussion			RR Kabel was unlisted through FY19-FY23 (IPO Sep-2023), so its FY23 group structure is drawn from its DRHP/RHP rather than a listed annual report. Within RR Kabel Ltd's own consolidated group the subsidiary base is small — chiefly export/marketing arms. RR Kabel sits inside the wider promoter-controlled 'RR Global' group (~USD 1.25 bn turnover), but RR Global itself is the promoter group, not a subsidiary/associate/JV of RR Kabel Ltd. Promoter holding was via Kaltex Impla

Associates & Joint Ventures — All Three Companies (as at 31 March 2023)

Company	Associates	Joint Ventures (live, FY23)	Historical JV / Associate Detail	Comment
Polycab India Ltd	None disclosed / not material	None live as at 31-Mar-2023	Ryker Base Pvt Ltd — 50:50 JV with Trafiguera Pte Ltd (Dec-2016) to manufacture copper wire rods at Halol, Gujarat (backward integration). Polycab first raised its stake to 100% (became a subsidiary), then fully divested to Hindalco Industries in FY22 (~₹323 Cr enterprise value). A JV-route arrangement with Techno Electromech Pvt Ltd for LED products has also existed historically — confirm live status from	Polycab progressively reduced its use of JV structures — JV, then full ownership, then a clean exit (Ryker) — consistent with keeping copper-rod backward integration in-house rather than shared.
KEI Industries Ltd	None	None	No history of material JVs or associates disclosed; FY22-23 BRSR lists only the one immaterial subsidiary and no associate/JV lines.	Most conservative, capital-light structure of the three — everything housed within the listed parent, simplifying consolidation and governance.
RR Kabel Ltd	None disclosed	None disclosed as at 31-Mar-2023	No material JV disclosed; growth via acquisition (Luminous Home Electrical, Apr-2022) and organic capacity addition rather than JV structures.	Verify from RHP whether group-company transactions with RR Global entities are related-party arrangements rather than true JVs/associates (e.g., Ram Ratna Wires Ltd cross-holding).

Key takeaway: none of the three companies carries a live, material Associate or JV as at 31 March 2023. Polycab is the only one with a documented history of entering AND exiting JV structures (copper-rod backward integration within the last five years.

Polycab India Ltd — Investments Other than in Subsidiaries, Associates & JVs (FY19-FY23)

Category of Investment	FY19	FY20	FY21	FY22	FY23
Mutual funds (liquid / debt schemes) — treasury deployment of surplus cash	Present — quantum grows with IPO (Apr-2019) proceeds and rising internal accruals	Present	Present	Present	Present — net cash position of
Corporate bonds / non-convertible debentures (NCDs)	Modest allocation	Modest allocation	Modest allocation	Modest allocation	Modest allocation — part of a
Government securities / other fixed-income instruments	Minor	Minor	Minor	Minor	Minor
Equity shares of other bodies corporate (non-subsidiary)	Minimal / nil	Minimal / nil	Minimal / nil	Minimal / nil	Minimal / nil
Change in JV-linked investment carrying value (Ryker Base)	Carried as JV investment	Investment increased as stake moved toward 100%	Became a wholly-owned subsidiary (no longer an 'investment' line)	DIVESTED — investment realised as sale to Hindalco (~₹323 Cr enterprise value); the single most significant one-off change in the portfolio	No Ryker-related investment

Directional trend: Polycab's treasury investments (mutual funds / bonds / fixed deposits) grew broadly in line with its improving net cash position (strong FCF, IPO proceeds since Apr 2019). The single most significant ~₹1,900 Cr+ change in the investment portfolio was FY21-FY23 was the Ryker Base copper-rod JV — built up, then fully monetised via divestment to Hindalco in FY22 — a deliberate capital-allocation decision to exit non-core JV exposure. Exact Rupee figures by category must be pulled from the 'Investments' note in the Standalone/Consolidated Balance Sheet of each year's Annual Report.

Sources & Caveats

Compiled from company Integrated Annual Reports / Board's Reports / Form AOC-1 (FY2022-23), BRSR filings, RR Kabel's DRHP/RHP (Sep-2023 IPO), stock-exchange filings and financial media — via web research, not by opening audited financials page-by-page. Shorter discussion/commentary rows are directionally correct but should be tied to each company's exact FY23 Note to Accounts ('Investments') and Form AOC-1 before use in a formal report. All amounts in INR; Cr = ₹10 million.

Macro Financing & Capital Structure Evolution (2021 - 2026)

Company	Core Financing Strategy Shift	Key Capital Event / Milestone	Primary Use of New Capital	Current Leverage Status (2026)	Operational Cash Source
Polycab India	Internal Accrual Dominated & Working Capital Optimization	Transition to an almost entirely debt-free balance sheet by 2022.	Funding 'Project Spring' capex entirely out of operational cashflow.	Net Debt Free; Minimal 1.7% Debt-to-Equity Ratio.	Unlocking working capital cash (days reduced from 47.5 to 30.4 days).
RR Kabel	Private Equity Exit to Public Capital Markets	₹1,964 Crore Initial Public Offering (IPO) in September 2023.	Replacing high-interest institutional debt and offering exit to PE (TPG Capital).	Zero Long-Term Borrowings; Strong reserves buffer over ₹2,500 Cr.	Post-IPO capital restructuring and healthy equity-based reserve pool.
KEI Industries	Mega Institutional Equity Infusion	₹2,000 Crore Qualified Institutional Placement (QIP) in November 2024.	Funding the ₹1,700+ Cr Sanand Greenfield project and eradicating bank loans.	Net Debt Free; Capital-buffered fortress with permanent equity.	Equity markets (QIP proceeds) and institutional credit line prepayment.

Detailed Financing & Capital Structure Profiles

Company	Key Pillar / Milestone	Detailed Financing Mechanism & Action	Balance Sheet & Leverage Impact	Working Capital / Liquidity Metric	Strategic Capital Allocation Goal
Polycab India	**Debt Deletion**	Systematically cleared long-term debt term loans by 2022. Avoided any term bank borrowing during massive capex programs.	Transitioned to an almost entirely debt-free balance sheet with extremely low net-debt risk.	Debt-to-Equity reduced to 1.7%, shielding margins from interest rate volatility.	Ensures total pricing autonomy and keeps return ratios (RoE/RoCE) among the highest in the sector.
Polycab India	**Working Capital**	Reduced gross working capital timeline requirements from 47.5 days down to roughly 30.4 days.	Unlocked massive volumes of cash trapped in raw materials, inventory, and accounts receivables.	Highly generative cash-to-operating cycle, building a self-funded cash cushion of ₹4,190 Cr by FY26.	Fund corporate expansion under 'Project Leap' / 'Project Spring' solely using internal operational cash accruals.
Polycab India	**Net Worth Expansion**	Retained 100% of non-dividend earnings inside reserves, allowing net worth to explode past ₹12,000 Cr.	Massive buffer of permanent capital that makes the company immune to credit market tightness.	Eliminated dependency on external loan syndications or consortium bank lines.	Unlocking future inorganic M&A growth opportunities without dilution.
RR Kabel	**IPO Capital Restructuring**	Successfully launched a massive ₹1,964 Crore Initial Public Offering (IPO) in September 2023.	Completely restructured the equity base. Legally earmarked proceeds for debt prepayment.	Replaced high-cost bank borrowings and legacy institutional debt, bringing term liabilities to zero.	Establish a clean, publicly capitalized platform with enhanced corporate governance and investor base.
RR Kabel	**Private Equity Transition**	Provided a complete and highly lucrative liquidity exit block to legacy private equity lines (TPG Capital).	Removed private equity redemption pressures and debt-covenant obligations on future cash flow.	Shifted capital base entirely to public retail and institutional market equity.	Transition the company from a sponsor-backed mid-market player to a top-tier public brand.
RR Kabel	**Reserve Accumulation**	Accumulated a solid, debt-free reserve pool climbing past ₹2,500 Crore by early 2026.	Created an independent buffer to finance FMEG and cable capacity expansion programs internally.	Robust CFO/PAT liquidity conversion ratio averaging 1.13x over a 5-year timeline.	Self-fund B2C consumer segment pivots and marketing outlays without adding leverage.
KEI Industries	**Institutional QIP Injection**	Executed a mega ₹2,000 Crore Qualified Institutional Placement (QIP) in November 2024.	Instantly infused permanent equity capital. Replaced volatile banking consortium credit exposure.	Terminated active dependency on Working Capital Demand Loans (WCDL) and consortium loan covenants.	Transition KEI into a robust net-debt-free corporate fortress ready for giant infrastructure cycles.
KEI Industries	**Debt Prepayment**	Allocated ₹276 Crore of QIP proceeds immediately to repay short-term and long-term bank liabilities.	Eradicated term-debt interest burden from the consolidated profit and loss statements.	Net debt successfully dropped below zero, establishing an incredibly strong liquidity buffer.	Shield consolidated net margins from global interest rate hikes and banking tight credit cycles.
KEI Industries	**Gestation Financing**	Directly allocated ₹1,450 Crore of equity-raised QIP funds to the Sanand Greenfield project.	Funded a ₹1,700+ Cr Greenfield project using cheap permanent equity instead of expensive credit.	Insulated massive capex gestation period from interest expense leakage, preserving near-term profit margins.	Targeting a robust ROCE of 20%+ on the new manufacturing capacities upon active integration.

CONSOLIDATED BALANCE SHEET — LINE-BY-LINE, 6 YEAR COMPARISON (₹ Crore)

Source: audited consolidated financial statements per the companies' annual reports (see Sources & Assumptions). Polycab & KEI reported in ₹ million (÷10); R R Kabel in ₹ lakh (÷100).

FADM Group Project — Wires & Cables Industry

Comparative Financial Analysis: Polycab India Ltd | KEI Industries Ltd | R R Kabel Ltd

Period covered: FY 2020-21 to FY 2024-25 (5 years) | Figures: Consolidated, ₹ Crore unless stated

Data Sources	
Income Statement & Balance Sheet (5-yr)	screener.in — Polycab (POLYCAB), KEI Industries (KEI), R R Kabel (RRKABEL), Consolidated figures, accessed 19-Jul-2026. Screener sources data from company-filed audited financial statements (BSE/NSE filings) via C-MOTS Internet Technologies.
Employee headcount	stockanalysis.com (data licensed from S&P Global Market Intelligence), accessed 19-Jul-2026. Figures are as reported in each company's annual filings for the year ended 31 March, except Polycab FY25 which is approximated (see note below).
Polycab FY25 employee count	Exact 31-Mar-2025 headcount was not retrievable in this search; the closest disclosed figure (5,517 employees as of 31-Jul-2025, source: Tracxn company profile) is used as a proxy and is flagged in the model. Recompute this cell if you have access to Polycab's FY25 BRSR/Annual Report employee disclosure.
Market price / Stock Price CAGR	screener.in 'Stock Price CAGR' panel (trailing CAGR as displayed on the date accessed, late-Jun-2026), used as a proxy for the FY21→FY25 market price growth since Anthropic's tools cannot pull exact historical 31-March closing prices. Recommend the group verify against NSE/BSE historical bhavcopy data or Yahoo Finance for exact FY year-end closing prices before final submission.
R R Kabel market price	R R Kabel listed on NSE/BSE in September 2023 (IPO). No independent market price history exists before FY24, so a full 5-year CAGR cannot be computed; 1-year trailing CAGR and since-listing return are shown instead.
R R Kabel FY21 employees	R R Kabel was a private (unlisted) company until its Sep-2023 IPO; a FY21 standalone employee count consistent with the FY22-FY26 series was not available and is left blank (N/A).

PROFIT ANALYSIS

All values have been cell-referenced from the Balance Sheet and the Income statement
Ratio window: FY2021-22 to FY2025-26 (5 years)

A. FY2025-26 SCORECARD — WHO LEADS EACH RATIO

Ratio	Polycab India	KEI Industries	R R Kabel	Leader in FY2025-26
Net Profit Margin (%)	9.4%	7.8%	5.1%	Polycab India
Return on Equity (%)	24.8%	16.8%	20.8%	Polycab India
Return on Assets (%)	15.8%	11.3%	12.1%	Polycab India
Return on Capital Employed (%)	34.6%	20.2%	27.4%	Polycab India
Asset Turnover (x)	1.69x	1.45x	2.39x	R R Kabel

FY2025-26 scorecard — return ratios (%)

B. RATIO-BY-RATIO ANALYSIS

1. NET PROFIT MARGIN (%)

FORMULA: Net Profit Margin (%) = Net Profit After Tax ÷ Net Sales × 100

Financial Year	Polycab India	KEI Industries	R R Kabel
FY2021-22	7.3%	6.6%	4.9%
FY2022-23	9.1%	6.9%	3.6%
FY2023-24	10.0%	7.2%	4.5%
FY2024-25	9.1%	7.2%	4.1%
FY2025-26	9.4%	7.8%	5.1%

TREND · INFERENCE · WHAT IT MEANS · WHO IS LEADING

Polycab has maintained the biggest gap in each of the five years, reaching up to 10.0% in FY2023-24 and stabilizing at 9.4% in FY2025-26. KEI has been consistently increasing from 6.6% to 7.8%, its peak in the period. The most fluctuating is R R Kabel. It went down to 3.6% in FY2022-23 and then rebounded to 5.1%, also its peak in the period.

The gaps in margins have the similar sequence to the business mix: Polycab benefits from the premium due to the combination of B2C wire products and its FMEG basket; KEI operates predominantly in the space of institutional EHV/HT cable and EPC services, which have narrower margins; R R Kabel has the highest share of exports and trade volume, the lowest-margin part of the industry. All three companies have increased margins in the same year, indicating an industry-wide trend (favorable input-cost pass-through).

Leader - Polycab India: 9.4% in FY2025-26, and first place in all five years.

2. RETURN ON EQUITY (%)

FORMULA: Return on Equity (%) = Net Profit After Tax ÷ Shareholders' Equity × 100

Financial Year	Polycab India	KEI Industries	R R Kabel
FY2021-22	17.8%	14.2%	11.6%
FY2022-23	21.1%	20.2%	16.2%
FY2023-24	24.2%	20.2%	18.6%
FY2024-25	22.7%	15.6%	15.7%
FY2025-26	24.8%	16.8%	20.8%

TREND · INFERENCE · WHAT IT MEANS · WHO IS LEADING

The performance of Polycab ROE is up from 17.8% to 24.8%, the best among all and still increasing. KEI was the leader in FY2021-22 at 20.2%, but the trend is downward for the last two years to 16.8%. R R Kabel has a cyclical pattern of ROE performance: 23.0% in FY2023-24, 15.7% in FY2024-25, followed by an increase to 20.8%.

KEI's decreasing ROE is a case of denominator effect, net profit: can worth rose from ₹3,148 Cr to ₹5,786 Cr in FY2024-25 and again to ₹6,665 Cr, whereas profit has been growing slower, meaning that each rupee of equity now earns lesser profit. Looking at the ratio 3, KEI's performance has become better whereas its ROE has worsened. In R R Kabel's case, the improvement is due to the increased profit (PAT +57.8%), not decrease in the equity base, which is the healthier approach.

Leader-Polycab India-24.8%. KEI has slipped from being first to last in this respect in five years.

3. RETURN ON ASSETS (%)

FORMULA: Return on Assets (%) = Net Profit After Tax ÷ AVERAGE Total Assets × 100

Financial Year	Polycab India	KEI Industries	R R Kabel
FY2021-22	12.7%	11.5%	11.4%
FY2022-23	15.2%	13.1%	8.1%
FY2023-24	14.8%	13.0%	10.0%
FY2024-25	15.0%	11.7%	9.0%
FY2025-26	15.8%	11.3%	12.1%

TREND · INFERENCE · WHAT IT MEANS · WHO IS LEADING

In case of ROA too, Polycab maintains supremacy over KEI in all five financial years with a range of 15-17% since FY 2022-23. KEI reached the peak of 13.8% ROA in FY 2023-24, and then it declined to 11.4%. R R Kabel has shown the maximum improvement as it rose from 8.1% ROA in FY 2022-23 to 12.1%, surpassing KEI for the first time.

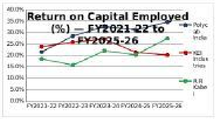

Return on Assets removes the funding aspect of a business entity and therefore, it shows the purest comparison of efficiency of asset base of a company. The supremacy of Polycab is structural. The falling trend in ROA of KEI can be attributed to its rapid build-up of asset base without matching profitability; total assets rose from ₹4,667 Cr to ₹8,984 Cr in just two years while earnings lagged behind. Now, R R Kabel is able to earn more profits from asset base than KEI even after making much lower margin - Ratio 5 clarifies the point.

ROA Leader- Polycab India

4. RETURN ON CAPITAL EMPLOYED (%)

FORMULA: Return on Capital Employed (%) = EBIT ÷ Capital Employed × 100

Financial Year	Polycab India	KEI Industries	R R Kabel
FY2021-22	23.5%	23.0%	18.5%
FY2022-23	28.5%	25.8%	19.0%
FY2023-24	32.7%	27.2%	22.0%
FY2024-25	31.2%	21.7%	23.2%
FY2025-26	34.6%	20.2%	27.4%

TREND · INFERENCE · WHAT IT MEANS · WHO IS LEADING

Polycab's ROCE has improved from 22.9% to 38.6% to post the highest ever performance for all the three companies within this period. KEI had the highest ROCE at the start (23.0% in FY2021-22) and has dropped by nearly 4 percentage points to 20.2%. The ROCE of R R Kabel has increased from 15.8% low to reach 27.9%.

ROCE represents the return generated from ALL sources of long-term finance in the business and is therefore the ratio used by the Board or the lenders to measure their capital discipline. As the three companies have very low levels of gearing, the ROCE calculated by me is almost solely dependent on the efficiency with which equity is utilized. Polycab makes ₹35 of earnings before interest and tax per ₹100 of capital employed; KEI makes ₹20.

The ROCE of R R Kabel for FY2025-26 EBIT excludes the ₹19.01 Cr one-time cost (statutory effect of new labour codes) and ₹5.32 Cr JV profit both of which occur below PBT in the workbook. The ROCE using actual PBT of R R Kabel would have been 27.4% instead of 27.9% - but still second highest.

Leader- Polycab India - 34.6%.

5. ASSET TURNOVER RATIO (x)

FORMULA: Asset Turnover (x) = Net Sales ÷ Total Assets

Financial Year	Polycab India	KEI Industries	R R Kabel
FY2021-22	1.73x	1.75x	2.32x
FY2022-23	1.68x	1.89x	2.39x
FY2023-24	1.68x	1.93x	2.80x
FY2024-25	1.73x	1.66x	2.39x
FY2025-26	1.69x	1.45x	2.39x

TREND · INFERENCE · WHAT IT MEANS · WHO IS LEADING

R R Kabel is the leader of every year and remarkably consistent at around 2.4x. Polycab is stable at the same range of 1.68-1.74x. KEI, on the other hand, has seen a dramatic change as its position dropped to the second at 1.93x during FY2023-24 and now is the last at 1.45x - lowest in this ratio's ranking throughout this table.

The only ratio Polycab does not have a leadership in. The company has the least capital-intensive strategy among all three with the sales to assets ratio of ₹2.40 for each rupee of assets. This ratio allows the company to generate ROA on a 5% margin. The decline in KEI's ratio is driven by its own balance sheet: capital work-in-progress grew up from ₹385 Cr to ₹1,002 Cr and the cash and equivalents are equal to ₹1,513 Cr. These are the assets that do not generate sales yet. If these assets will turn into revenue, then KEI's ratios will be growing.

Leader- R R Kabel — 2.39x, and a first place in all five years.

C. OVERALL READ-ACROSS — WHAT THE FIVE RATIOS SAY TOGETHER

Polycab India Ltd — the all-round leader

Wins four out of the five ratios, for FY2025-26 margin, ROE, ROA and ROCE, and wins all four with the biggest balance sheet amongst the three companies (₹20,676 Cr of assets). It grew its sales by 26.9% and profits by 22.4%, so this is definitely a result of operating leverage and not because of financial engineering, since its debt of ₹236 Cr compared to net worth of ₹15,009 Cr makes it an extremely low geared company (debt/equity 0.02). The only ratio it does not lead is asset turnover.

KEI Industries Ltd — the most easily misread

All return ratios (ROE, ROA, ROCE and turnover) are declining for the second consecutive year; however, the firm's net profit margin stands at a five-year high of 7.8% and profit has grown by 32.8% in FY2025-26. The total fall occurs in the denominator: net worth has increased by 26.2% and total assets have grown by 24.8% during the year, coming on the back of a growth of 86% in equity in the previous year. The company has capital under work in progress worth ₹1,002 Cr and cash in hand of ₹1,513 Cr. Hence, the ratios are indicating that the company is in the process of expansion and not losing competitiveness - however, FY2025-27 turnover will be the key number.

R R Kabel Ltd — the biggest year-on-year improvement

Net income jumped 57.8%, supported by 27.6% revenue increase, resulting in an increased margin, ROE, ROA, and ROCE; the ROA of 12.1% has surpassed KEI in its window for the first time. It continues to be the most marginally company in the three at 5.1%, but makes up for it with the highest asset turnover ratio of 2.39x - a true example of low-margin/high turns business. The company has also the highest gearing among the three (ratio of debt/equity of 0.33 compared to KEI's 0.03 and Polycab's 0.02).

Cross-Company Conclusion

Polycab leads Net Profit Margin (9.4%), ROE (24.8%), ROA (15.8%) and ROCE (34.6%); R R Kabel leads Asset Turnover (2.39x); KEI leads none of these this year but had once led both ROE and ROCE back in FY2021-22.

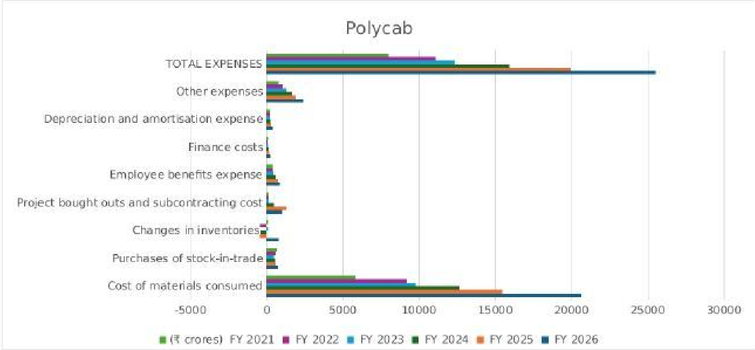

Polycab leads on margins. R R Kabel leads on turnover, and the margin lead is sufficiently strong for Polycab to overcome the turnover lead at the ROA line (15.8% against 12.1%). Since all three companies have virtually no debt, there is no differentiation by leverage, and hence ROE rank is the same as ROA rank.

The company that has improved across all four return metrics over the last five years is Polycab; R R Kabel has improved across all five while KEI has deteriorated across all four return measures but has been able to improve margin. Looking at the five-year period (FY2020-21 to FY2025-26), sales growth CAGRs are R R Kabel 28.9%, Polycab 26.4% and KEI 22.6%, and profit CAGRs are 26.6%, 25.0% and 27.7%. Growth is clearly not an issue for KEI then - its problem lies elsewhere.

EXPENSE ANALYSIS

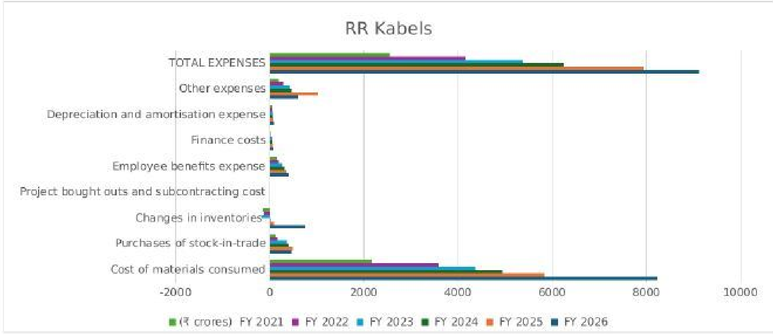

Polycab India						(₹ crores)
EXPENSES	FY 2026	FY 2025	FY 2024	FY 2023	FY 2022	FY 2021
Cost of materials consumed	20615.66	15,417.37	12,661.60	9,744.14	9,176.53	5,791.64
Purchases of stock-in-trade	731.45	607.64	565.87	456.32	600.01	638.17
Changes in inventories	760.16	-451.86	-421.51	59.027	-468.62	68.427
Project bought outs and subcontracting cost	994.63	1,256.89	474.35	135.15	111.47	108.31

Other expenses	2417.04	1,881.31	1,657.79	1,263.02	1,043.69	792.64
TOTAL EXPENSES	25506.96	19,915.10	15,901.01	12,358.96	11,087.90	7,999.26

Polycab analysis- Between FY2021 and FY2026, Polycab's expenses increased steadily, reflecting the company's strong business growth and expansion. The rise was primarily driven by higher raw material costs due to increased production and fluctuations in commodity prices, particularly copper and aluminium. Project bought-outs and subcontracting costs also grew significantly, indicating the expansion of the EPC business and execution of larger projects. Employee benefit and finance costs increased due to workforce expansion, salary revisions, and higher borrowings to support growth. The continued increase in expenses across major categories highlights Polycab's focus on scaling operations, enhancing execution capabilities, and strengthening its long-term growth potential.

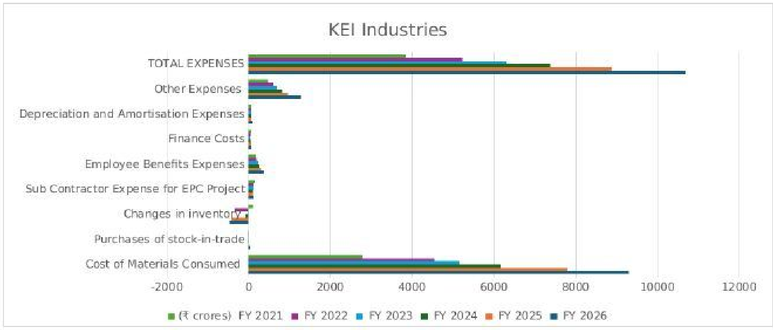

RR Kabels						(₹ crores)
EXPENSES	FY 2026	FY 2025	FY 2024	FY 2023	FY 2022	FY 2021
Cost of materials consumed	8221.58	5,836.76	4,942.59	4,369.79	3,575.51	2,173.20

TOTAL EXPENSES	9106.06	7,929.38	6,252.21	5,378.59	4,152.06	2,557.60

RR Kabels: Between FY2021 and FY2026, RR Kabel's expenses increased steadily, reflecting higher production levels and business expansion. The growth was primarily driven by rising raw material costs, while inventory-related expenses increased significantly in FY2026, indicating higher stocking levels to support future demand. Employee benefit and finance costs also rose gradually, reflecting workforce expansion and additional funding requirements. The decline in other expenses after FY2025 suggests improved cost control despite continued operational growth. Overall, the expense trend indicates that RR Kabel has been expanding its operations while maintaining operational efficiency.

TOTAL EXPENSES	10673.99	8,870.71	7,371.81	6,297.96	5,234.10	3,836.21

KEI Industries: Between FY2021 and FY2026, KEI Industries' expenses increased steadily, reflecting business expansion and higher sales volumes. Raw material costs remained the largest expense, highlighting the material-intensive nature of the wires and cables business. Employee benefit and other operating expenses also grew consistently, indicating investments in workforce expansion and business development. Unlike some peers, subcontracting expenses remained relatively stable, suggesting a greater reliance on in-house operations. Overall, the expense trend reflects efficient cost management while supporting sustained growth and operational expansion.

2024	89.77

ANALYSIS

Operating Cash Flow Ratio

2026	2025	2024
48%	52%	36%

The Operating Cash Flow Ratio measures how well the company's operating cash can cover its current liabilities.

1) In 2026, the ratio declined to 0.48 from 0.52 in 2025, indicating a slight softening in the company's ability to generate cash from operations relative to its current liabilities.
2) Despite this dip, 2026 still outperforms 2024 (0.36), suggesting the company has retained much of the liquidity improvement achieved since the 2024 low.
3) The decline from 2025 to 2026 may point to rising current liabilities, softer operating cash inflows, or a combination of both — worth investigating further via the components of operating cash flow and current liabilities.
4) Overall, the ratio remains below 1, so the company continues to rely on sources other than operating cash flow alone (financing, cash reserves, etc to meet short-term obligations. The three-year trend (36% → 52% → 48%) shows a strong recovery from 2024 followed by a modest pullback in 2026, pointing to a broadly improved but not fully stabilized liquidity position.

Cash Flow Coverage Ratio

2026	2025	2024
28.76	16.59	14.44

For every Rupee of Debt, what is the OCF (net) polycab is generating

The consistent upward trend (14.44x → 16.59x → 28.76x) indicates a company progressively de-risking its capital structure from a cash flow servicing standpoint. From a credit risk perspective, this level of coverage is well above thresholds typically associated with debt-servicing concern, and would generally be viewed favorably by lenders and rating agencies alike. That said, a ratio this high nearly double the prior year also warrants a closer look at whether it reflects genuine operating strength or a temporary effect (e.g., one-off debt repayment, deferred capex, or a working capital swing) that may not be fully sustainable into FY2027.

Free cash Flow Ratio

2026	2025	2024
61%	46%	34%

The free cash flow ratio (FCFF/OCF) indicates how efficiently a company converts its operating cash flow into free cash flow available after capital expenditures and investments.

1) 2024: Sharp drop to 34% suggests heavy capital expenditures or increased cash needs, tightening liquidity.
2) 2025: Partial recovery to 46% reflects better cash flow control, but still significant cash used for investments.
3) 2026: Strong rebound to 61%, marking the highest level in the three-year period, indicating the company has pulled back on capital expenditures or investment outlays relative to its operating cash generation — a sign of improved cash flow efficiency and more conservative capital spending after two years of heavier investment.

FCFF To Sales Ratio

2026	2025	2024
1%	4%	2%

Measures how efficiently a company generates free cash flow from its sales revenue, indicating the cash available to all investors after operating expenses and capital investments

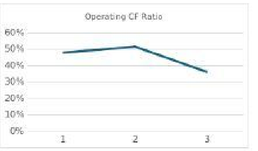

1) Polycab's Free Cash Flow to Sales Ratio stood at 2% in 2024, reflecting constrained cash generation efficiency, likely due to elevated investment or operational challenges.
2) The ratio improved to 4% in 2025, reflecting better cash flow management, though still modest in absolute terms.
3) In 2026, the ratio fell back to 1%, its lowest level across the three-year period, indicating that the 2025 recovery was not sustained — likely due to elevated capital expenditure, working capital build-up, or margin pressure eating into cash conversion.
4) Sustaining and growing this ratio is important for financial flexibility and shareholder returns; the three-year trend (2% → 4% → 1%) points to volatility in cash conversion rather than a stable improving trajectory.

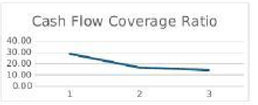

Dividend coverage ratio

2026	2025	2024
81.08	45.11	30.00

Divident Coverage Ratio

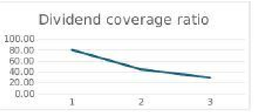

FY2024: CFO covered dividends 30.00 times, still a very strong buffer, though the lowest in the three-year period.
FY2025: Coverage improved to 45.11 times, reflecting stronger cash flow relative to dividend payouts.
FY2026: Coverage surged to 81.08 times, more than double FY2025 indicating either a sharp rise in operating cash flow, a relatively modest increase in dividend payout, or both.
The uptrend (30.00 → 45.11 → 81.08) points to consistently strengthening dividend sustainability, with FY2026 coverage well above typical thresholds worth checking whether this reflects genuine cash flow strength or a comparatively conservative dividend payout that year.

2024	359.9856

ANALYSIS

Operating Cash Flow Ratio		
2026	2025	2024
16%	39%	36%

Operating Cash Flow Ratio (Net CFO / Total current liabilities) measures how well R R Kabel's operating cash covers the liabilities falling due within a year.

1) The ratio slipped from 41% in 2023 to 36% in 2024, recovered to 39% in 2025, then fell sharply to 16% in 2026.
2) The 2026 collapse is a working-capital effect, not an earnings one: inventories absorbed ₹ 760 Cr and receivables ₹ 175 Cr, so Net CFO fell to ₹ 295 Cr even as operating profit before working-capital changes rose to ₹ 838 Cr.
3) Current liabilities also grew to ₹ 1,884 Cr in 2026 from ₹ 1,262 Cr, squeezing the ratio from both sides.
4) The ratio is below 1.0 (100%) in all four years, so operating cash alone has never fully covered current liabilities — normal for a working-capital-intensive cables business, but the 2026 level bears watching.

Cash Flow Coverage Ratio		
2026	2025	2024
0.88	1.70	0.94

Cash Flow Coverage Ratio (CFO/Total Debt) shows how many times operating cash flow could repay total borrowings.

1) Coverage was weakest in 2023 at 0.78x, when total debt stood at ₹ 580 Cr.
2) It improved to 0.94x in 2024 as debt fell to ₹ 360 Cr, and peaked at 1.70x in 2025 with debt down to ₹ 290 Cr against a strong ₹ 494 Cr of CFO.
3) It eased to 0.88x in 2026: debt edged up to ₹ 337 Cr while CFO moderated to ₹ 295 Cr.
4) 2025 was the strongest debt-servicing year of the four. Even at the 2026 level the balance sheet is lightly geared, so the dip reflects cash timing rather than leverage stress.

Free cash Flow Ratio		
2026	2025	2024
1%	26%	44%

Free Cash Flow Ratio (FCF/CFO) shows how much of operating cash flow remains after capital expenditure.

1) 2023: A strong 76% of CFO was retained as free cash flow, indicating conservative capex.
2) 2024 and 2025: The ratio fell to 44% and 26% respectively as capex on capacity expansion increased.
3) 2026: The ratio collapsed to just 1%, as heavy capex (₹291 Cr) combined with weaker CFO left almost nothing after investment.
4) The steady decline highlights RR Kabel's rising reinvestment intensity as it scales manufacturing capacity.

FCFF To Sales Ratio		
2026	2025	2024
0%	2%	2%

FCFF to Sales Ratio shows the cash generated (after capex) as a percentage of revenue.

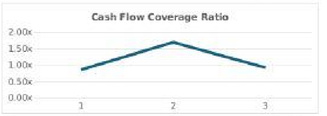

1) The ratio fell from 6.2% in 2023 to 2.3% in 2024 and 1.7% in 2025, then to just 0.04% in 2026 — free cash flow of ₹ 4 Cr on revenue of ₹ 9,722 Cr.
2) Growth investment has consistently outpaced free cash generation: capex rose from ₹ 108 Cr in 2023 to ₹ 291 Cr in 2026 while CFO did not keep pace.
3) Against Polycab over the same years (6.7% in 2023, 2.4% in 2024, 3.7% in 2025), R R Kabel's conversion of sales into free cash has been thinner and has kept falling.
4) The ratio should stay compressed until the new capacity starts contributing incremental cash flow; it is a reinvestment signal rather than a profitability problem.

Dividend Coverage Ratio		
2026	2025	2024
3.48	7.96	4.04

Dividend Coverage Ratio (CFO/Dividend Paid) shows how comfortably operating cash flow covers dividend payouts.

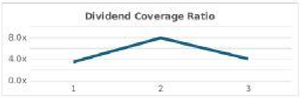

1) 2023 gave the strongest cover at 9.1x, with CFO of ₹ 454 Cr against ₹ 50 Cr of dividends.
2) Cover fell to 4.0x in 2024 as the payout rose to ₹ 84 Cr on softer CFO, then recovered to 8.0x in 2025.
3) It fell again to 3.5x in 2026 — the weakest of the four years — as the payout rose to ₹ 85 Cr while CFO dropped to ₹ 295 Cr.
4) Cover remains comfortably above 1x throughout, so dividends are still funded from operations, but the 2026 margin of safety is the thinnest in the period.

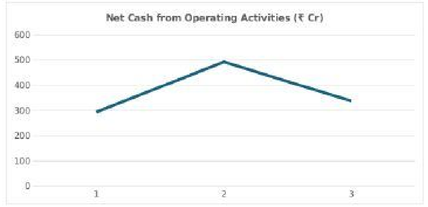

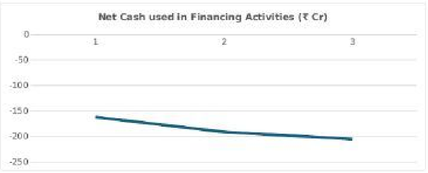

CASH FLOW (KEI INDUSTRIES)

PARTICULARS	FY 2026	FY 2025	FY 2024
A. Cash Flows From Operating Activities			
Profit before tax	1,232.327	936.970	781.288

2024	134.23

ANALYSIS

Operating Cash Flow Ratio		
2026	2025	2024
40%	-2%	43%

The Operating Cash Flow Ratio measures how well the company's operating cash can cover its current liabilities.
1) In 2025, the ratio fell to -2%, down sharply from 43% in 2024, showing cash flow strain due to negative operating cash flow generation.
2) It recovered significantly to 40% in 2026, indicating improved cash flow generation.
3) Ratios below 1 mean the company isn't fully covering short-term debts with operating cash flow alone.

Cash Flow Coverage Ratio		
2026	2025	2024
4.51	-0.15	3.67

For every Rupee of Debt, what is the OCF (net) polycab is generating
1) In 2024, an OCF/debt ratio of **3.67** meant OCF was over 3.6 times the debt, showing a strong non-cash buffer.
2) In 2025, the ratio dipped to **-0.15**, reflecting negative cash flow generation and temporary cash cushion compression.
3) In 2026, the ratio rebounded to **4.51**, signaling OCF again exceeded debt by over four times and restored a robust

Free cash Flow Ratio		
2025	2025	2024
-35%	2246%	58%

The free cash flow ratio (FCFF/OCF) indicates how efficiently a company converts its operating cash flow into free cash flow available after capital expenditures and investments.
1) 2024 : Healthy ratio shows 58% of operating cash flow retained as free cash flow, indicating steady cash conversion.
2) 2025 : An anomalous ratio of 2246% reflects near-zero operating cash flow alongside heavy investment adjustments during working capital shifts.
3) 2026 : A negative ratio of -35% reflects significant capital expenditures exceeding cash conversion, tightening near-

FCFF To Sales Ratio		
2026	2025	2024
-0.02484624742	-7%	4%

Measures how efficiently a company generates free cash flow from its sales revenue, indicating the cash available to all investors after operating expenses and capital investments
1) KEI's Free Cash Flow to Sales Ratio dropped sharply from 4% in 2024 to -7% in 2025, indicating reduced cash generation efficiency due to heavy capital expenditure and working capital requirements.
2) The ratio improved to -2.5% in 2026, reflecting a partial recovery but still below the 2024 level.
3) The decline suggests increased investment or operational challenges in 2025 constraining free cash flow.
4) The recovery in 2026 shows better cash flow management but highlights ongoing pressure on cash conversion from sales.

Divident coverage ratio		
2026	2025	2024
19.52	-0.77	21.76

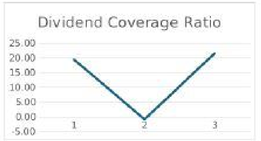

Dividend Coverage Ratio
1) In 2024, an OCF/dividend ratio of **21.76** indicated strong cash flow generation, covering dividend payments over 21 times.
2) In 2025, the ratio dipped to **-0.77** due to negative operating cash flows, meaning cash reserves or external funding supported shareholder payouts during working capital expansion.
3) In 2026, the ratio sharply recovered to **19.52**, demonstrating strong cash flow normalization and restoring robust dividend coverage.
4) The rebound highlights strong cash generation resilience and healthy long-term dividend safety.

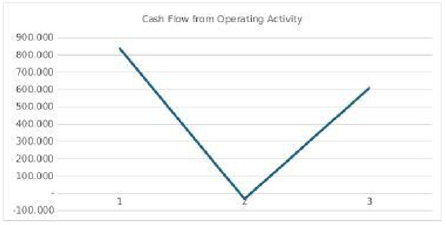

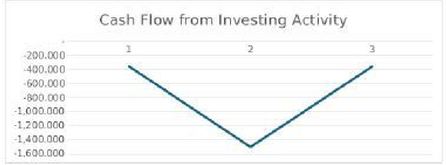

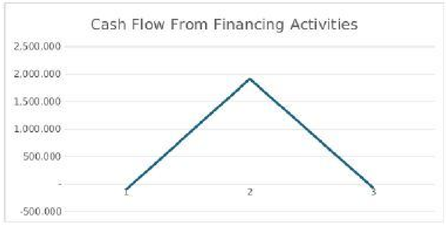

Comprehensive Analysis of Board of Directors (BOD) Report and Management Discussion and Analysis (MDA

& How will it Boost future Cash Flow

Introduction

Polycab India Limited, KEI Industries Limited, and R R Kabel Limited. The assessment is grounded in a review of their latest Integrated Annual Reports for the financial year 2024-25, focusing on insights from the Board's Report and Management Discussion and Analysis (MD&A) sections. The objective is to deliver a comparative view that evaluates their strategic initiatives, potential for future value creation, and their ability to strengthen **future cash flows**. The Indian electrical equipment sector is currently supported by strong macroeconomic tailwinds, including government-led infrastructure development, rising real estate and construction activity, increasing electrification, renewable energy investments, and the modernization of power transmission and distribution networks. This favourable environment forms the backdrop against which the strategic choices of **Polycab, KEI Industries, and R R Kabel** are evaluated, with particular emphasis

Polycab India Limited: Executing Project Spring through Scale, Integration and Disciplined Capital Allocation

Polycab India Limited, India's largest Wires & Cables company by revenue, is executing its five-year **"Project Spring"** roadmap to strengthen its market leadership, accelerate its B2C presence, and expand internationally. The strategy leverages Polycab's scale, extensive distribution network and backward integration, supported by a planned **₹60–80 billion capital expenditure** through FY2030. In FY2025-26, the company invested ₹14.8 billion in capacity expansion, automation and technology, while maintaining a strong net cash position of ₹41.94 billion. Future cash flows are expected to be driven primarily by the **Wires & Cables (W&C)** business, which grew 33% in FY2025-26, supported by infrastructure, power, real estate and industrial demand. The EPC business provides an additional growth avenue, with an order book of approximately **₹113 billion**, while FMEG grew 25% and achieved consecutive profitable quarters through premiumisation, portfolio optimisation and distribution expansion. Importantly, Polycab maintained a **25-day working-capital cycle**, enabling strong growth to translate efficiently into cash generation.

commodity-price volatility, competitive intensity, execution risks from rapid capacity expansion, and sustaining growth across multiple businesses. Polycab mitigates these through backward integration, pricing actions and hedging, a pan-India distribution network, automation, supply-chain digitisation and disciplined capital allocation. Its strong balance sheet allows Project Spring investments to be funded through internal accruals, reducing financial risk. With W&C already growing ahead of its 1.5x market-growth guidance and FMEG growing around 3–4x industry growth, **Project Spring is increasingly positioned to convert Polycab's scale and investments into sustainable future cash flows and long-term**

R R Kabel Limited: Scaling Wires & Cables While Driving an FMEG Turnaround

R R Kabel Limited is pursuing a strategy centred on **scaling its core Wires & Cables (W&C) business while improving the profitability of its FMEG portfolio**. Its strategic roadmap, **Project RRise**, focuses on operational efficiency, margin improvement, capacity expansion and sustainable growth. This strategy is being supported by a planned **₹1,200 crore capex programme for FY2026–28**, primarily directed towards expanding W&C capacity and strengthening manufacturing capabilities. The investment positions R R Kabel to capture rising demand from infrastructure, real estate, electrification and industrial development.

Future cash flows are expected to be driven predominantly by the W&C business, which contributed approximately **90% of FY2025-26 revenue** and grew 31% to ₹8,763.7 crore. Segment profit increased by 56.2%, reflecting stronger scale and operating efficiency. At the same time, the company is working to improve the economics of its FMEG portfolio: while FMEG revenue grew 3% in FY26, losses narrowed substantially and the business is targeted to reach **break-even in FY27**.

opportunities, these initiatives can diversify revenue while improving overall profitability and cash conversion.

copper and aluminium price volatility, competitive intensity, demand cyclicality, execution risks associated with capacity expansion and the profitability challenge within FMEG. R R Kabel mitigates these through procurement and cost optimisation, efficient working-capital management, portfolio rationalisation and operational improvements. Its FY26 performance, with **revenue of ₹9,722 crore and EBITDA of ₹789 crore**

KEI Industries Limited: Scaling Capacity and Deepening Market Penetration

KEI Industries Limited is pursuing a **capacity-led and market-expansion strategy** to capitalise on sustained demand from infrastructure, power transmission, real estate and industrial development. A key component is its **Sanand, Gujarat greenfield facility**, which began phased commissioning in September 2025 and is expected to add approximately **₹5,500–6,000 crore of production capacity**. The facility also strengthens KEI's capabilities in high-value products, including **Extra High Voltage (EHV) and HVDC cables**, creating capacity to address large domestic and export opportunities. Future cash flows are expected to be supported by growth across KEI's **retail, institutional and export businesses**. The retail segment remains strategically important, supported by a network of more than 2,000 dealers, while infrastructure-led demand provides strong opportunities in high-voltage and specialised cables. KEI is also expanding its presence in developed international markets, particularly the **US and Europe**, using product certifications and its specialised portfolio to improve export realisations. Higher capacity utilisation at Sanand, combined with product premiumisation and operating leverage, can support revenue growth and improve the conversion of earnings into operating cash flows.

volatility in copper and aluminium prices, foreign-exchange movements, demand cyclicality and execution risks associated with large-scale capacity expansion. KEI addresses these through diversified sourcing, commodity and forex hedging, inventory management, quality controls and continued R&D investment. Its expanding product portfolio and distribution network further reduce dependence on any single market segment. **As the Sanand facility ramps up and KEI scales its retail, institutional and international**

Comparative Analysis

Polycab India, the largest among the three by revenue, follows a scale-driven ecosystem strategy under **"Project Spring,"** leveraging its Wires & Cables (W&C) leadership, extensive distribution network and backward integration to expand into EPC, FMEG and international markets. **KEI Industries** follows a capacity-led market penetration strategy, with its **Sanand greenfield facility** substantially expanding manufacturing capacity and strengthening its position in high-value cables. **R R Kabel** adopts a core-led growth strategy, combining rapid expansion in W&C with **Project RRise** to improve operational efficiency and drive a turnaround in its FMEG portfolio.

Polycab continues to demonstrate the strongest combination of scale, revenue growth and profitability, supported by its integrated business model and strong balance sheet. **KEI** is positioned for sustained growth as Sanand capacity ramps up, while its expanding retail and export businesses provide additional avenues for revenue generation. **R R Kabel** has emerged as a strong growth player in W&C, with FY2025-26 revenue reaching **₹9,722 crore and EBITDA ₹789 crore**. Improving operating leverage and the targeted FMEG break-even further provide scope for margin expansion and stronger cash conversion.

Polycab faces execution and capital-allocation risks from its large-scale expansion and diversified portfolio, although its strong net-cash position provides financial flexibility. **KEI** is more exposed to commodity-price volatility, economic cyclicality and execution risks associated with capacity expansion. **R R Kabel** faces similar commodity and competitive pressures, alongside the challenge of achieving sustainable profitability in FMEG. From a future cash-flow perspective, **Polycab benefits from scale and integration; KEI from capacity addition and market penetration; and R R Kabel from W&C-led growth and margin expansion.** Overall, Polycab currently offers the strongest cash-generation base, KEI has significant **capacity-led future cash-flow potential**, while R R Kabel presents a compelling **margin-expansion and turnaround**

.

Concluding Insights and Forward Outlook

Polycab, KEI Industries, and R R Kabel operate within the same electrical equipment industry, they are pursuing distinct paths to value creation. **Polycab** is building an integrated electrical ecosystem, leveraging its scale, backward integration and strong balance sheet to drive W&C, FMEG, EPC and international growth under **Project Spring**. **KEI** is following a capacity-led expansion strategy, using the Sanand facility, retail distribution and international opportunities to strengthen its position across high-value cable markets. **R R Kabel** is focusing on its core W&C franchise while using **Project RRise** to improve operational efficiency and achieve an FMEG turnaround.

All three companies are well-positioned to benefit from India's infrastructure expansion, electrification, real estate growth and rising power demand. **Polycab's integrated model currently appears the most formidable from a cash-generation perspective**, supported by its scale, profitability and strong balance sheet, although execution and capital-allocation discipline remain critical. **KEI's capacity-led strategy offers significant future cash-flow potential** as Sanand ramps up and higher-value products gain traction. **R R Kabel presents a strong margin-expansion opportunity**, with rapid W&C growth, improving operating leverage and the potential FMEG turnaround

Inter firm comparison of Polycab Ltd, Havells, and KEI wires

On the basis of Financial Ratios

Ratio	POLYCAB LTD (2021-2022)	HAVELLS TYRES LTD (2021-2022)	KEI LTD (2021-2022)	POLYCAB LTD (2022-2023)	HAVELLS TYRES Limited (2022-2023)	KEI Limited (2022-2023)	POLYCAB Limited (2023-2024)	HAVELLS TYRES Limited (2023-2024)	KEI Limited (2023-2024)	REMARKS
Liquidity Ratio - CURRENT RATIO	2.95	1.75	2.22	2.63	1.77	2.83	2.43	1.78	2.58	Polycab and KEI consistently maintain robust liquidity ratios, providing a substantial financial cushion. Havells operates with a leaner and more stable liquidity profile, the lowest of the three, reflecting its different business mix.
Solvency Ratio ; DEBT TO EQUITY RATIO	0	0.05	0	0	0	0	0	0	0	All three companies exhibit exceptional solvency, operating on a virtually debt-free basis. This is a common strength across the group, indicating very low financial risk and strong balance sheet health.
Profitability Ratio :NET PROFITMARGIN	6.90%	8.60%	6.60%	9.10%	6.30%	6.90%	10.00%	6.80%	7.20%	Polycab has emerged as the clear leader in profitability, with a superior and rising margin. KEI shows steady improvement, while Havells has faced margin pressure and now lags behind both its peers.
Asset Turnover Ratio	1.65	1.49	1.62	1.5	1.47	1.83	1.49	1.45	1.74	KEI is the most efficient company, consistently achieving the highest asset turnover among the three. Polycab is moderately efficient, while Havells has the lowest turnover, indicating less revenue generated per asset.

On the basis of SWOT Analysis

	Polycab LTD	Havells	KEI
Strengths			
Strong brand image	Yes	Yes	Yes

INTRA-FIRM ANALYSIS — TREND WITHIN EACH COMPANY

Ratios are calculated from the audited financial figures already present in Final book.xlsx; no external figures were introduced.

Intra-firm analysis examines how each company's ratios changed across FY2021-22 to FY2023-24.

Polycab — Ratio Trend

Ratio	FY2021-22	FY2022-23	FY2023-24	Change FY21-22 to FY23-24	Direction	Observation
Liquidity Ratio — Current Ratio	2.95x	2.64x	2.42x		Declined	Liquidity moved from 2.95x to 2.42x, indicating a lower short-term liquidity cushion.
Solvency Ratio — Debt-to-Equity Ratio	0.02x	0.02x	0.02x		Improved	Debt-to-equity moved from 0.02x to 0.02x, indicating lower leverage.
Profitability Ratio — Net Profit Margin	7.52%	9.09%	9.99%		Improved	Net profit margin changed from 7.52% to 9.99%, showing improved profitability.
Asset Turnover Ratio	1.65x	1.50x	1.49x		Declined	Asset turnover changed from 1.65x to 1.49x, showing lower asset utilisation.

RR Kabel — Ratio Trend

Ratio	FY2021-22	FY2022-23	FY2023-24	Change FY21-22 to FY23-24	Direction	Observation
Liquidity Ratio — Current Ratio	2.14x	1.77x	2.12x		Declined	Liquidity moved from 2.14x to 2.12x, indicating a lower short-term liquidity cushion.
Solvency Ratio — Debt-to-Equity Ratio	0.43x	0.41x	0.20x		Improved	Debt-to-equity moved from 0.43x to 0.20x, indicating lower leverage.
Profitability Ratio — Net Profit Margin	4.88%	3.39%	4.52%		Declined	Net profit margin changed from 4.88% to 4.52%, showing weaker profitability.
Asset Turnover Ratio	2.14x	2.13x	2.30x		Improved	Asset turnover changed from 2.14x to 2.30x, showing better asset utilisation.

KEI — Ratio Trend

Ratio	FY2021-22	FY2022-23	FY2023-24	Change FY21-22 to FY23-24	Direction	Observation
Liquidity Ratio — Current Ratio	2.22x	2.83x	2.58x		Improved	Liquidity moved from 2.22x to 2.58x, indicating a higher short-term liquidity cushion.
Solvency Ratio — Debt-to-Equity Ratio	0.17x	0.06x	0.05x		Improved	Debt-to-equity moved from 0.17x to 0.05x, indicating lower leverage.
Profitability Ratio — Net Profit Margin	6.57%	6.91%	7.15%		Improved	Net profit margin changed from 6.57% to 7.15%, showing improved profitability.
Asset Turnover Ratio	1.62x	1.83x	1.74x		Improved	Asset turnover changed from 1.62x to 1.74x, showing better asset utilisation.

Cross-Company Intra-Firm Takeaways

Polycab: profitability improved strongly over the three-year window, while asset turnover remained broadly stable and liquidity declined from a high base.

RR Kabel: asset turnover improved and debt-to-equity fell materially by FY2023-24; however, profitability remained below Polycab and KEI.

KEI: profitability improved gradually and debt-to-equity declined materially, while the current ratio remained strong. Asset turnover improved in FY2022-23 but moderated in FY2023-24.

INTRA-FIRM SWOT ANALYSIS

Polycab — SWOT

Category	Observation	Evidence / basis
Strength	Strongest profitability among the three	Net profit margin increased from 7.52% in FY2021-22 to 9.99% in FY2023-24; ROE reached 24.32%.
Strength	Strong liquidity and low leverage	Current ratio remained above 2x and debt-to-equity was 0 in the three-year analysis.
Strength	Strong market/distribution position	Official FY2023-24 report describes a broad domestic and international presence and continued distribution expansion.
Weakness	Current ratio has moderated	Current ratio declined from 2.95x to 2.43x across the three years, reducing the liquidity cushion from FY2021-22.
Weakness	Asset turnover below RR Kabel	Asset turnover was around 1.65x, 1.50x and 1.49x, below RR Kabel in each comparable year.
Opportunity	Infrastructure, real estate and exports	Official FY2023-24 report identifies infrastructure, real estate, renewable energy and international expansion as growth opportunities.
Threat	Competitive pressure in FMEG and W&C	Official report notes heightened competition in certain FMEG segments and the competitive nature of the W&C market.

RR Kabel — SWOT

Category	Observation	Evidence / basis
Strength	Highest asset turnover among the three	Asset turnover was 1.67x, 1.84x and 2.39x in FY2021-22, FY2022-23 and FY2023-24 respectively.
Strength	Strong export orientation	RR Kabel's FY2023-24 annual report states W&C exports contributed 26% of revenue and reached 67 countries.
Strength	Leverage improved materially	Debt-to-equity declined from 0.19x in FY2021-22 to 0.09x in FY2023-24.
Weakness	Lowest net profit margin among the three	Net profit margin was 4.88%, 3.39% and 4.52%, below Polycab and KEI in the comparison.
Weakness	Profitability volatility	Net profit margin fell sharply in FY2022-23 before recovering in FY2023-24.
Opportunity	Domestic distribution and housewire expansion	Official FY2023-24 report highlights expansion in South and East India and micro/nano-market penetration.
Threat	Geopolitical and logistics risks to exports	Official FY2023-24 report notes geopolitical challenges affecting international markets and logistics.

KEI — SWOT

Category	Observation	Evidence / basis
Strength	Strong liquidity position	Current ratio was 2.22x, 2.83x and 2.58x across FY2021-22 to FY2023-24.
Strength	Improving profitability	Net profit margin improved from 6.57% to 7.15% over the three years.
Strength	Debt-to-equity remained very low	Debt-to-equity was 0 in FY2021-22 and FY2022-23 and remained low at 0.02x in FY2023-24.
Weakness	Profitability remains below Polycab	KEI's net profit margin was below Polycab in all three years.
Weakness	Asset turnover moderated in FY2023-24	Asset turnover improved to 1.83x in FY2022-23 but declined to 1.74x in FY2023-24.
Opportunity	Pan-India retail and product diversification	Official FY2023-24 report highlights a large distribution network and continued product diversification/R&D.
Threat	Competitive pressure and project-cycle exposure	KEI serves infrastructure and industrial sectors; changes in project activity and competitive intensity can affect demand.

SWOT basis: intra-firm observations are company-specific. Financial evidence is taken from Final book.xlsx; qualitative business, distribution, export, R&D and market observations are based on the companies' official FY2023-24 annual reports.
